

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently amended) A method for transferring a document into a folder, the method comprising:

identifying a portion of a document; ~~and~~

transferring the document into a folder associated with the identified portion; and

wherein if more than one portion of a same document is identified, the same document can be transferred into more than one folder associated with particular identified portions of the document and if no relevant folder exists to accept the identified portion of the document, a new folder will be created.

2. (Original) The method of claim 1, wherein said identifying includes selecting a word within the document.

3. (Original) The method of claim 1, wherein said identifying includes selecting a symbol within the document.

4. (Original) The method of claim 1, wherein said identifying includes clicking on the portion.

5. (Original) The method of claim 1, wherein said identifying includes speaking the portion.

6. (Original) The method of claim 1, wherein said identifying includes touching the portion.

7. (Original) The method of claim 1, wherein the folder includes a pre-established folder.

8. (Original) The method of claim 1, further indicating that the document is being transferred into the folder.

9. (Original) The method of claim 1, further indicating that the document has been transferred into the folder.

10. (Original) The method of claim 1, further indicating that the document is being transferred into a second folder associated with a second identified portion.

11. The method of claim 1, further indicating that the document has been transferred into a second folder associated with a second identified portion.

12. (Original) The method of claim 11, wherein the second folder includes a pre-established folder.

13. (Original) The method of claim 11, wherein the second folder includes a newly established folder based on the second identified portion.

14. (Currently amended) A computer-readable medium storing codes for enabling a processor to perform a method for transferring a document into a folder, the method comprising:
identifying a portion of a document; ~~and~~
transferring the document into a folder associated with the identified portion; and
wherein if more than one portion of a same document is identified, the same document can be transferred into more than one folder associated with particular identified portions of the document and if no relevant folder exists to accept the identified portion of the document, a new folder will be created.

15. (Original) The computer-readable medium of claim 14, wherein said identifying includes selecting a word within the document.

16. (Original) The computer-readable medium of claim 14, wherein said identifying includes selecting a symbol within the document.

17. (Original) The computer-readable medium of claim 14, wherein said identifying includes clicking on the portion.

18. (Original) The computer-readable medium of claim 14, wherein said identifying includes speaking the portion.

19. (Original) The computer-readable medium of claim 14, wherein said identifying includes touching the portion.

20. (Original) The computer-readable medium of claim 14, wherein the folder includes a pre-established folder.

21. (Original) The computer-readable medium of claim 14, further indicating that the document is being transferred into the folder.

22. (Original) The computer-readable medium of claim 14, further indicating that the document has been transferred into the folder.

23. (Original) The computer-readable medium of claim 14, further indicating that the document is being transferred into a second folder associated with a second identified portion.

24. (Original) The computer-readable medium of claim 14, further indicating that the document has been transferred into a second folder associated with a second identified portion.

25. (Original) The computer-readable medium of claim 24, wherein the second folder includes a pre-established folder.

26. (Original) The computer-readable medium of claim 24, wherein the second folder includes a newly established folder based on the second identified portion.

27. (Currently amended) An apparatus for transferring a document into a folder, comprising:

means for identifying a portion of a document; ~~and~~

means for transferring the document into a folder associated with the identified portion;

and

wherein if more than one portion of a same document is identified, the same document can be transferred into more than one folder associated with particular identified portions of the document and if no relevant folder exists to accept the identified portion of the document, a new folder will be created.

28. (Original) The apparatus of claim 27, wherein said means for identifying includes means for selecting a word within the document.

29. (Original) The apparatus of claim 27, wherein said means for identifying includes means for selecting a symbol within the document.

30. (Original) The apparatus of claim 27, wherein said means for identifying includes means for clicking on the portion.

31. (Original) The apparatus of claim 27, wherein said means for identifying includes means for speaking the portion.

32. (Original) The apparatus of claim 27, wherein said means for identifying includes means for touching the portion.

33. (Original) The apparatus of claim 27, wherein the folder includes a pre-established folder.

34. (Original) The apparatus of claim 27, further including means for indicating that the document is being transferred into the folder.

35. (Original) The apparatus of claim 27, further including means for indicating that the document has been transferred into the folder.

36. (Original) The apparatus of claim 27, further including means for indicating that the document is being transferred into a second folder associated with a second identified portion.

37. (Original) The apparatus of claim 27, further including means for indicating that the document has been transferred into a second folder associated with a second identified portion.

38. (Original) The apparatus of claim 37, wherein the second folder includes a pre-established folder.

39. (Original) The apparatus of claim 37, wherein the second folder includes a newly established folder based on the second identified portion.

40. (Currently amended) An apparatus for transferring a document into a folder, comprising:

an input device capable of receiving information;

a memory unit capable of storing information; and

a processor communicatively coupled with the input unit and the memory unit, the processor capable of carrying out a method for transferring a document into a folder, the method comprising:

identifying a portion of a document; ~~and~~

transferring the document into a folder associated with the identified portion; and

wherein if more than one portion of a same document is identified, the same document can be transferred into more than one folder associated with particular identified portions of the document and if no relevant folder exists to accept the identified portion of the document, a new folder will be created.

41. (Original) The apparatus of claim 40, wherein said identifying includes selecting a word within the document.

42. (Original) The apparatus of claim 40, wherein said identifying includes selecting a symbol within the document.

43. (Original) The apparatus of claim 40, wherein said identifying includes clicking on the portion.

44. (Original) The apparatus of claim 40, wherein said identifying includes speaking the portion.

45. (Original) The apparatus of claim 40, wherein said identifying includes touching the portion.

46. (Original) The apparatus of claim 40, wherein the folder includes a pre-established folder.

47. (Original) The apparatus of claim 40, the method further indicating that the document is being transferred into the folder.

48. (Original) The apparatus of claim 40, the method further indicating that the document has been transferred into the folder.

49. (Original) The apparatus of claim 40, the method further indicating that the document is being transferred into a second folder associated with a second identified portion.

50. (Original) The apparatus of claim 40, the method further indicating that the document has been transferred into a second folder associated with a second identified portion.

51. (Original) The apparatus of claim 50, wherein the second folder includes a pre-established folder.

52. (Original) The apparatus of claim 50, wherein the second folder includes a newly established folder based on the second identified portion.
